ECG for ED Physicians  
12.09.2019, Day one  
For students and doctors with basic ECG knowledge

The ECG course focuses on the recognition and interpretation of the ECG in the emergency setting. This course will guide you through a practical and systematic approach to many ECG abnormalities encountered in both the emergency and critical care setting.

Patient safety and outcome goals depend on clinicians being able to rapidly and accurately assess an ECG. This course will introduce the candidate to a systematic and practical approach to electrocardiographic interpretation through basic, complex and challenging ECG's.
