

European Register for Osteopathic Physicians

You are a student of medicine in the 5th or 6th year

EROP offers you a course in Palpation and Parallel Knowledges in Osteopathy

Experienced physicians formed in Osteopathy introduce you to the possibilities of diagnostic palpation and the principles of Osteopathy.

Are you interested in learning more about palpation? Then join us in the next course!

The European Register for Osteopathic Physicians (EROP) organizes introductory weekend-courses for medical students. In lectures and “hands-on” workshops we will train you in using your hands to examine patients. We will give you an idea, how principles of osteopathic medicine and functional anatomy could increase your diagnostic capabilities and how you can easily implement these competencies into your daily medical work.

The weekend courses are organized in: Italy (September 2016), Switzerland (Spring 2017), Germany (Fall 2017). EROP is an umbrella organisation of medical osteopathic organisations throughout Europe.

Topics of the course:

- Spine: Palpation and functional examination
- Principles of Osteopathy and its Philosophy
- Palpation of the skull and presentation of the Cranio-sacral System
- Palpation of the abdomen and presentation of principles of Visceral Osteopathy

Invitation for the course in Switzerland.

Limitation of participants per course: 30

Registration fee for students: free

Accommodation (Hostel): covered by EROP

Travel: organised and paid by each participant
